

To my local Optician,

I have seen a pair of **m.kenics** frames and would LOVE to get a pair! Would you be able to get them in for me to view?

Don't worry **Eyeterernity Ltd** have **no minimum order** requirements so you can just get the one frame in for me!

You can contact Eyeterernity Ltd using the details below.

Many thanks,

Your Valued Customer

- Titanium
- Super Lightweight
- No Screws, No Welding
- Flexible
- Hand made in Japan
- Carbon Fibre Range Available

The "Art of Engineering" is a fundamental element of **m.kenics** frame design. The company's philosophy is based on using alternative mechanical engineering methods than those used for existing frame manufacture. A team of designers and engineers using this philosophy, find alternative solutions for optical frame construction.

m.kenics are *superlight*, with most frames being a mere *5 grams!* The plastic frames are made from a fibre reinforced acetate sheet, the metal frames and arms are *Beta Titanium*.

Eyeterernity Ltd is proud to offer:-

- No Minimum Order
- Fast Delivery
- Easy Exchange
- Excellent Customer Service
